

REINE MARIO L. JAVAL

PROFESSIONAL SUMMARY

As a BSIT student at Ateneo de Naga University, I am passionate about utilizing technology to create intuitive user experiences through UI/UX design. I am fascinated by the intersection of technology and creativity, and I am always seeking out new ways to hone my skills in this area. Additionally, my interest in critical thinking has also drawn me towards software testing, as I enjoy analyzing systems and identifying areas for improvement. With a strong attention to detail and a commitment to delivering high-quality work, I am excited to explore opportunities that will allow me to apply my skills in both UI/UX design and software testing.
